Total tested positive since beginning:	1674	
Mansfield Community Designation Level	Yellow	Red-higher risk Yellow- moderate risk Green- lower risk
Covid-19 Related Deaths	23	Last Covid death in Mansfield 03/01/21

Vaccine Distribution in Mansfield as of March 25, 2021

- [When You've Been Fully Vaccinated](#)

[COVID-19 vaccines](#) are effective at protecting you from getting sick. Based on what we know about COVID-19 vaccines, people who have been fully vaccinated can start to do some things that they had stopped doing because of the pandemic.

People are considered fully vaccinated:

- 2 weeks after their second dose in a 2-dose series, such as the Pfizer or Moderna vaccines, or
- 2 weeks after a single-dose vaccine, such as Johnson & Johnson's Janssen vaccine

If it has been less than 2 weeks since your 1-dose shot, or if you still need to get your second dose of a 2-dose vaccine, you are NOT fully protected. Keep taking all [prevention steps](#) until you are fully vaccinated.

We're still learning how vaccines will affect the spread of COVID-19. After you've been fully vaccinated against COVID-19, you should keep taking [precautions](#) in public places like wearing a mask, staying 6 feet apart from others, and avoiding crowds and poorly ventilated spaces until we know more.

Continue to wear a mask and practice physical distancing after vaccination. We don't yet know whether getting a COVID-19 vaccine will prevent you from spreading the virus to other people, even if you don't get sick yourself. Experts are also looking at how many people get vaccinated and how COVID-19 is spreading in communities.

Until we learn more, continue to:

- Wear a mask over your nose and mouth.
- Stay at least 6 feet away from others.
- Avoid crowds and poorly ventilated spaces.
- Wash your hands often.

If you've been around someone who has COVID-19, you do not need to stay away from others or get tested unless you have symptoms. Fully vaccinated people who do not quarantine should still monitor for [symptoms of COVID-19](#) for 14 days following an exposure. If they experience symptoms, they should isolate themselves from others, be clinically evaluated for COVID-19, including SARS-CoV-2 testing, if indicated, and inform their health care

- **Getting Tested**

If you develop symptoms of COVID-19, even if they are mild, please contact your healthcare provider and a test site near you to schedule a test. You can also [check your symptoms online](#).

More information about testing can be found on the [COVID-19 Testing](#) webpage.

- **Vaccine Eligibility Timeline**

- **[Steps to Get Your Vaccination](#)**

Step 1: Check your eligibility below or [use our tool](#)

Step 2: Preregister for a mass vaccination location or find a location and schedule your appointment

There are different ways to find a vaccine appointment:

- Preregister at [VaccineSignUp.mass.gov](https://vaccineSignUp.mass.gov) to be notified when it's your turn to schedule an appointment at one of **7 mass vaccination locations**: Fenway Park, Gillette Stadium, Reggie Lewis Center, DoubleTree Hotel in Danvers, Eastfield Mall in Springfield, Natick Mall and former Circuit City in Dartmouth.
- Use [VaxFinder.mass.gov](https://vaxfinder.mass.gov) to search for appointments at pharmacies, health care providers, and other community locations

Massachusetts receives a limited supply of COVID-19 vaccine doses from the federal government each week. Due to high demand and very limited supply, it may take several weeks

to schedule an appointment or to be notified that an appointment is available at mass vaccination locations.

At this point, the Town does not have any vaccine for public distribution.

Council on Aging staff is available to assist any vaccine-eligible seniors who need help navigating the scheduling process. Please call 508-261-7368.

Step 3: [Prepare for your appointment](#)
