

## COMMUNITY UPDATE COVID-19

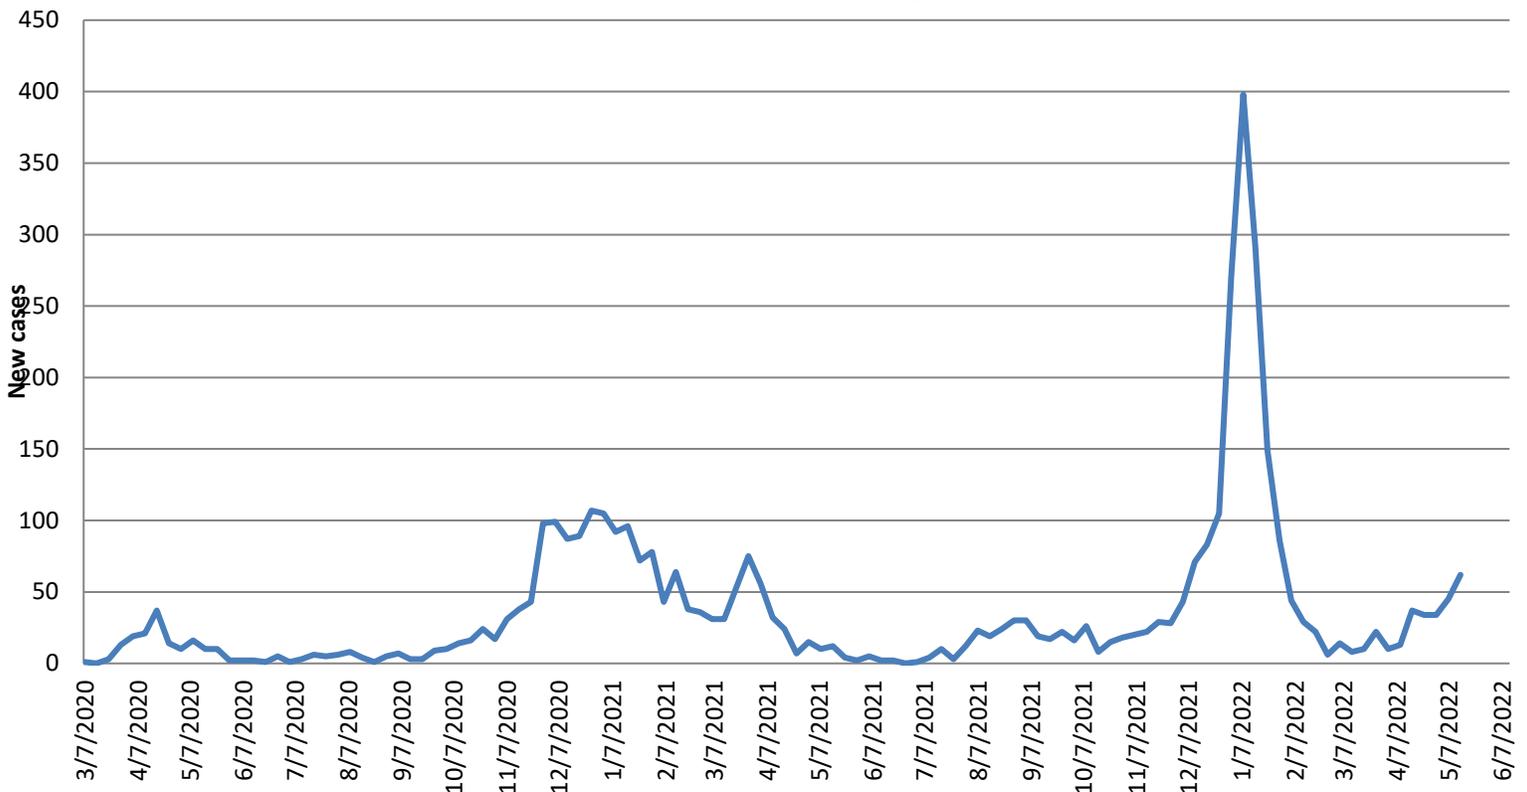

**May 23, 2022:**

The Town of Mansfield continues its community update on our website with our up to date information and important tips for the public as it relates to the COVID-19 pandemic. For more complete information, please see the town [coronavirus webpage](#).

- **As of today, please see the below chart that represents our communities COVID-19 relates cases:**

<i>Mansfield Covid-19 Workflow</i>	#	
Positive COVID-19 under isolation	<b>62</b>	(updated 05/23 08:00)
Positive Cases recovered	<b>4404</b>	
Total tested positive since beginning:	<b>4503</b>	
Covid-19 Related Deaths	<b>37</b>	Last Covid death in Mansfield 3/22/22

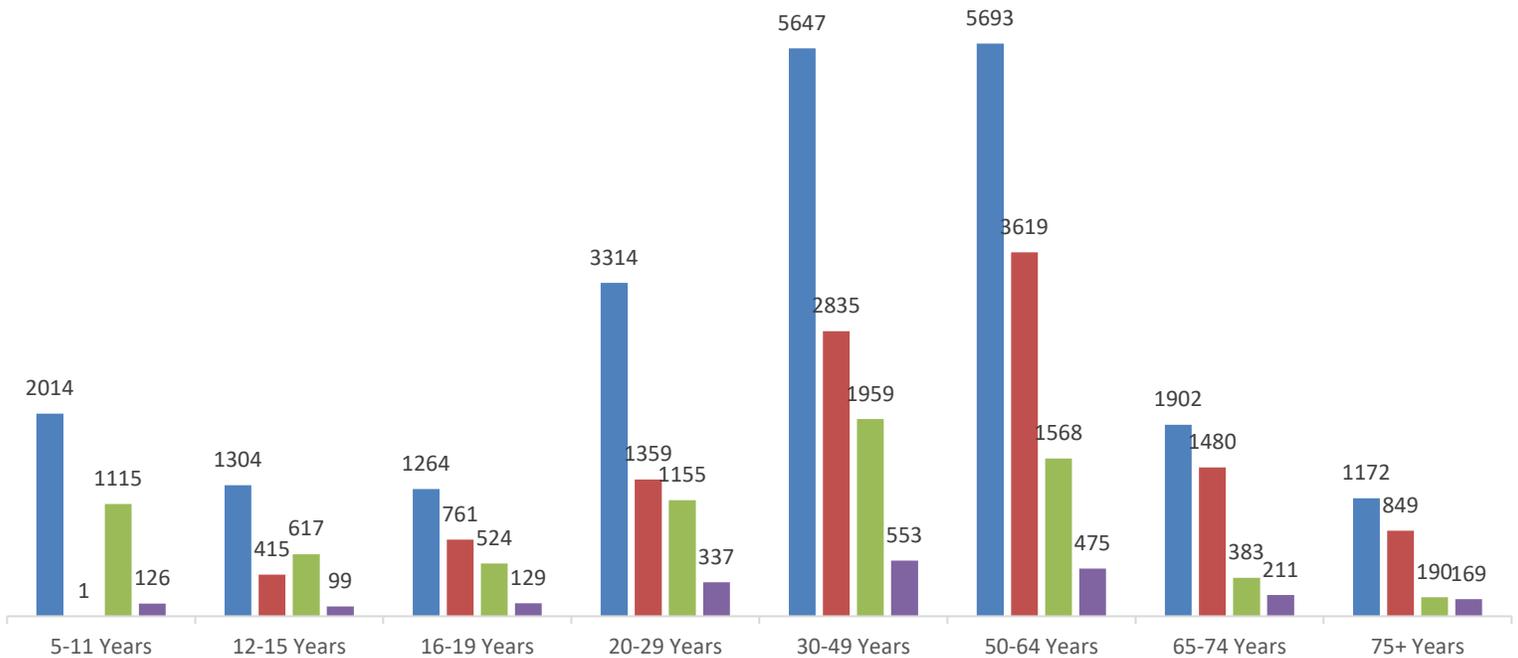

**New COVID-19 cases per week\***  
**March 7, 2020 - May 14, 2022**

\* At home test results are not reported nor included in state data

## Vaccine Distribution in Mansfield- data through May 17, 2022

■ Population ■ Individuals with booster doses ■ Fully vaccinated individual, no booster ■ Partially vaccinated individuals

All data obtained from [Massachusetts COVID-19 vaccination data and updates | Mass.gov](https://www.mass.gov/info-details/massachusetts-covid-19-vaccination-data-and-updates)

**! COVID-19 VACCINE BOOSTER UPDATE**

### Who should get a booster?

- Everyone ages 5 and older

### Who should get a second booster?

- Everyone ages 50 and older
- Everyone ages 12 and older who has a weakened immune system

 [cdc.gov/coronavirus](https://www.cdc.gov/coronavirus)

326630-0K

For the week ending May 20, 2022, [cases](#) and [hospitalizations](#) continued to rise as the United States marked one million deaths from COVID-19. While about 54% of the U.S. population is experiencing low [COVID-19 Community Levels](#), many areas have moved into medium and high levels. COVID-19 Community Levels can help communities and individuals make decisions based on their local context and unique needs.

[COVID-19 vaccination](#) remains the best option to lower your risk of severe illness, hospitalization, and death if you get infected. Many people have started vaccination, but most have not stayed [up to date](#). About 78% of people in the United States have received at least one dose of a COVID-19 vaccine, and

66.5% are fully vaccinated. Of those who are fully vaccinated, 46.4% have received a booster and are considered up to date. Everyone ages 5 years and older is eligible to receive one booster after

receiving their COVID-19 vaccine primary series. [Some people](#) are eligible to receive a second booster.

People who are up to date on vaccines have much lower risk of serious illness and death from COVID-19 compared to people who are unvaccinated. CDC's COVID Data Tracker shows that in March 2022, adults ages 18 years and older who were unvaccinated were about [5 times](#) more likely to be hospitalized with COVID-19 than those who were up to date. In the same month, people ages 12 years and older and unvaccinated were [17 times](#) more likely to die of COVID-19 than those who were up to date.

COVID-19 vaccines available in the United States are [effective](#) at protecting people from getting seriously ill, being hospitalized, and even dying—especially people who are boosted. As with other diseases, you are protected best from COVID-19 when you stay up to date with recommended vaccines.

Find your vaccine or booster: [www.vaxfinder.mass.gov](http://www.vaxfinder.mass.gov).

- [COVID-19 Mask Requirements](#)

#### Free N95 Respirators

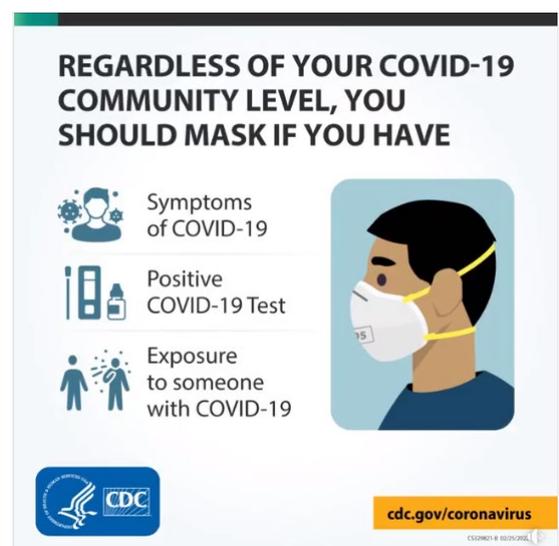

The Strategic National Stockpile has distributed N95 respirators to pharmacy distribution centers throughout the country. For information about how to use your N95 correctly, see [How to Use Your N95 Respirator](#).

#### [Free Mask Locator](#)

Find free masks (N95 respirators) at a participating location near you. Click [here](#).

- [Get Vaccinated and Boosted Against COVID-19 for individuals age 5+](#)

The Centers for Disease Control and Prevention (CDC) recommends that [Americans stay "up to date" with COVID-19 vaccines](#), rather than be "fully vaccinated." Up to date means a person has received all recommended COVID-19 vaccines, including any booster dose(s) when eligible. Fully vaccinated means a person has received their primary series of COVID-19 vaccines.

### **Who is eligible to get a booster?**

CDC recommends everyone ages 5 years and older receive a COVID-19 vaccine booster after completing their primary COVID-19 vaccination series. Some people can receive two boosters.

#### 1st booster

Everyone age 5 and older can get a booster after they have had their primary vaccine series:

- At least 5 months after completion of an mRNA (Pfizer or Moderna) vaccine primary series
- At least 2 months after completion of a Janssen/J&J primary dose.

#### 2nd booster

- Anyone age 50 and older may get a 2nd booster at least 4 months after their 1st booster
- Anyone age 12 and older with certain medical conditions may get a 2nd booster at least 4 months after their 1st booster
- Anyone age 18-49 years with certain medical conditions, and who **received Janssen/J&J** COVID-19 Vaccine as **both** their primary series dose and their booster dose, **at least 4 months** after the first Janssen booster dose

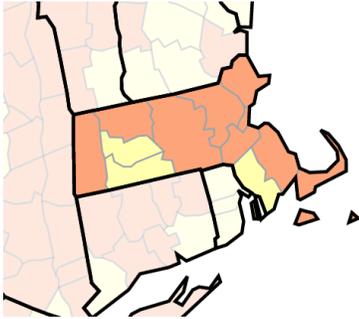

Three COVID-19 vaccines are authorized or approved for use in the United States to prevent COVID-19. You can mix and match vaccines. Your booster does not need to be the same vaccine brand as your original COVID-19 vaccination. If you are ages 12-17, you can only get a Pfizer booster. Pfizer-BioNTech or Moderna (COVID-19 mRNA vaccines) are preferred. You may get Johnson & Johnson's Janssen COVID-19 vaccine [in some situations](#).

- [Bristol County COVID-19 Community Level is identified as MEDIUM](#)

[COVID-19 Community Levels](#) are a tool to help communities decide what prevention steps to take based on the latest data. Levels can be low, medium, or high and are determined by looking at hospital beds being used, hospital admissions, and the total number of new COVID-19 cases in an area. Take precautions to protect yourself and others from COVID-19 based on the COVID-19 Community Level in your area.

In **Bristol County**, community level is **MEDIUM**. Stay [up to date](#) with COVID-19 vaccines. [Get tested](#) if you have symptoms. Wear a mask if you have symptoms, a positive test, or exposure to someone with COVID-19. Wear a mask on [public transportation](#). You may choose to wear a mask at any time as an additional precaution to protect yourself and others. If you are at [high risk for severe illness](#), consider wearing a mask indoors in public and taking [additional precautions](#). If you are immunocompromised, learn more about [how to protect yourself](#).

**COVID-19 Community Level designations throughout Massachusetts today:**

County	COVID-19 Community Level
Barnstable	High
Berkshire	High
<b>Bristol</b>	<b>Medium</b>
Dukes	High
Essex	High
Franklin	High
Hampden	Medium

County	COVID-19 Community Level
Hampshire	Medium
Middlesex	High
Nantucket	High
Norfolk	High
Plymouth	High
Suffolk	High
Worcester	High

**What Prevention Steps Should You Take Based on Your COVID-19 Community Level?**

Community Burden Levels		
Low	Medium	High

**The CDC has a new [COVID-19 Quarantine and Isolation \(Q&I\) Calculator](#)** which offers customized information to address each unique situation. It takes the stress out of figuring when, and for how long, people with COVID-19 and close contacts need to stay home, get tested, and wear a well-fitting mask. The calculator provides important information about what precautions people with COVID-19 and their close contacts can take to protect loved ones and prevent COVID-19 in their communities. This online, mobile-friendly calculator provides a simple, easy-to-use way to help people follow CDC's [Quarantine and Isolation](#) guidance and get customized information that applies to their unique situation.

To use the tool:

- People with COVID-19 who do not have symptoms need to know the date they were tested for COVID-19
- People with COVID-19 who have symptoms need to know the date their symptoms began
- Close contacts need to know the date they last came into close contact with someone with COVID-19

- [Treatments for COVID-19](#)

Treatment is available for people who are at increased risk of severe disease, test positive for COVID-19 and have any symptoms, even mild ones (such as runny nose or cough). The sooner you start treatment, the better.

- **Call your doctor right away** to learn about your treatment options, OR
- **Call (508) 213-1380** to speak with a Gothams representative. If you're eligible for COVID-19 treatment, they can schedule an infusion appointment for you at one of their 7 sites in Massachusetts. Gothams COVID-19 Self-Referral Treatment Line is open Monday–Saturday from 8 a.m. to 6 p.m.
